## 2. Verify the Hardware Connection

Check the following LEDs' status. If the Internet LED  is on, your router is connected to the internet successfully.

Power  
On

Internet  
On

Wi-Fi  
On

Note: If the Internet LED does not turn on, please refer to Q2 of **Need Help?** in this guide.

For better internet connection, make sure 2 or 3 bars of the Signal Strength LED  are lit. Otherwise, try relocating the router to a spot that may receive a stronger mobile network signal, such as near a window.

## 1. Connect the Hardware

## 3. Enjoy the Internet

### • Wired

Connect your computers to the router's LAN ports via Ethernet cables.

### • Wireless

- a. Find the SSIDs (network names) and wireless password printed on the label at the bottom of the router.

- b. Click the network icon of your computer or go to Wi-Fi settings of your smart device, and then select the SSID to join the network.

# Customize the 4G LTE Router

1. Make sure your computer is connected to the router (wired or wireless).
2. Launch a web browser and type in <http://tplinkmodem.net> or <http://192.168.1.1>. Create a new password for future logins.

Note: If the login page does not appear, please refer to Q1 of *Need Help?* in this guide.

3. Follow the step-by-step instructions of the **Quick Setup** to complete the initial configuration.

Note: The router can also be used (or configured) in Wireless Router Mode for DSL/Cable connections. For more advanced configurations, please refer to the user guide on TP-Link official website at [www.tp-link.com](http://www.tp-link.com).

# Configure the router via Tether App

The TP-Link Tether app provides a simple, intuitive way to access and manage your router.

-  Block unwelcome users from connecting to your network
-  Change the basic wireless network settings
-  View information about clients connected to your router
-  Set up Parental Controls with access time

## How to begin?

1. Download the TP-Link Tether app.

2. Open the Tether app and log in with your TP-Link ID.  
Note: If you don't have an account, create one first.
3. Tap the **+** button in the Tether app and select **Router > 3G/4G Router**. Follow the steps to complete the setup and connect to the internet.

# Need Help?

## Q1. What should I do if I cannot access the web management page?

- If the computer is set to a static IP address, change its settings to obtain an IP address automatically.
- Make sure <http://tplinkmodem.net> or <http://192.168.1.1> is correctly entered in the web browser.
- Use another web browser and try again.
- Reboot your router and try again.
- Disable and enable the active network adapter in use.

## Q2. What should I do if I cannot access the internet?

- Verify that your SIM card is an LTE or WCDMA card.
- Verify that your SIM card is in your internet service provider's service area.
- Verify that your SIM card has sufficient credit.
- Check the LAN connection: Open a web browser and enter <http://tplinkmodem.net> or <http://192.168.1.1> in the address bar. If the login page does not appear, refer to Q1 and then try again.
- Launch a web browser, log in to the web management page, and check the following:
  - 1) Go to **Advanced > Network > Internet** to verify the parameters provided by your ISP are correctly entered. If the parameters are incorrect, click **Create Profile** and enter the correct parameters, then select the new profile from the **Profile Name** list.
  - 2) Go to **Advanced > Network > PIN Management** to verify if PIN is required. If it is, enter the correct PIN provided by your ISP, and click **Save**.
  - 3) Go to **Advanced > Network > Data Settings** to verify if the **Total/Monthly Used** exceeds the **Total/Monthly Allowance**. If it does, click **Correct** and set **Total/Monthly Used** to 0 (zero), or disable **Data Limit**.
  - 4) Go to **Advanced > Network > Internet** to verify that **Mobile Data** is enabled. If it is not, enable it to access the internet.
  - 5) Confirm with your ISP if you are in a roaming service area. If you are, go to **Advanced > Network > Internet** to enable **Data Roaming**.

## Q3. How do I restore the router to its factory default settings?

- With the router powered on, press and hold the **WPS/RESET** button on the rear panel of the router until the Power LED starts flashing, then release the button. Wait while the router resets.
- Log in to the web management page of the router, and go to **Advanced > System Tools > Backup & Restore**, click **Factory Restore** and wait until the reset process is complete.

## Q4. What should I do if I forget my web management page password?

- If you are using a TP-Link ID to log in, click **Forgot password** on the login page and then follow the instructions to reset it.
- Alternatively, refer to **Q3** to reset the router, then create a new password to log in.

## Q5. What should I do if I forget my wireless network password?

- The default wireless password is printed on the product label of the router.
- Connect a computer directly to the router using an Ethernet cable. Log in to the router's web management page and go to **Basic > Wireless** to retrieve or reset your wireless password.
