

Czujnik pracuje jako AP:
„Weather station”
Strona startowa pod
adresem: 192.168.4.1

IAQ - po 5-ciu minutach
off on

Main features

Environmental Unit
Measures pressure, humidity,
temperature and gas

Pressure
Measures barometric
pressure and altitude

Relative Humidity
Measures relative humidity
with a fast response time

Temperature
Measures ambient
temperature

Gas
Measures Volatile Organic
Compounds (VOC)
